FIREGEAR® by earthcore®

IMPORTANT

Model: INSULATION24X24

The (2) 24” x 24” fiberglass insulation sheets supplied in this kit are for Thermocouple Flame Sense (TFS) fire pits that will be using ***Decorative Gas Logs*** on the fire pit during operation. If you do not know if logs will be used, it is best to install the insulation to prevent possible issues later.

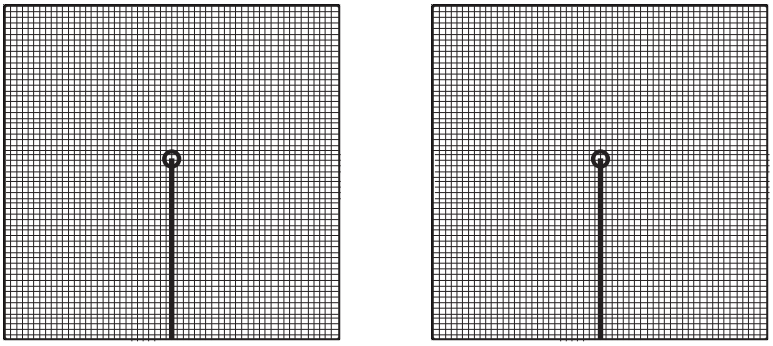

Fig. 1 Two 24 x 24 insulation sheets with foil finish.

Each insulation sheet has a slit from the center of the insulation to the outside edge. Simply slide the insulation sheet (foil side facing up) from the open slit to the center covering the top of the stainless steel box. Ensure the enclosure has the proper 18-inch square inches per side of cross ventilation according to the installation manual.

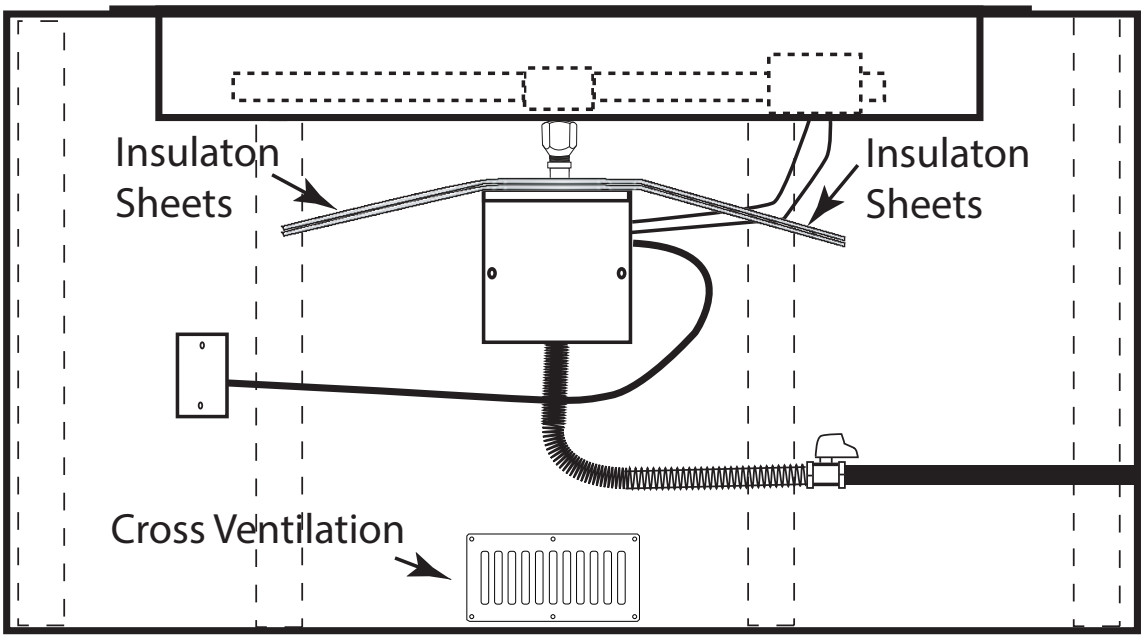

Fig. 2 Insulation installed over top of stainless steel box.
